

Sprung Structures

Tensioned Membrane Structures Available Immediately from Inventory

New Expeditionary Structure Featuring The Innovative “Armadillo” Hangar Door

This new design represents Sprung’s answer to the military’s repeated requests for a reliable and cost effective solution that is easily deployable. Sprung set out to design a large door system that would allow for an entire end opening while at the same time eliminating all the problems associated with the folding collapsible clam style openings that have a reputation for failure and short life span. This cutting edge design will offer easy, reliable and consistent service for years.

- Sizes currently available in 80ft and 95 ft wide by unlimited length in 12ft to 15 ft modules
- Designed to be shipped in 20ft ISO containers
- Able to be erected easily without cranes or man lifts when required...scaffolding only!
- No foundation required
- All aluminum substructure – Indefinite lifespan
- 12 year warranted membrane – can be easily re-skinned when necessary

Facts about the Armadillo Door

This Armadillo Hangar Door is a superior door system to any expeditionary hangar door ever developed. This Armadillo design opens using electrically operated dual winches. The interlocking modules rise up into the structure and remain fully tensioned at all times providing a robust door system that is virtually maintenance free.
