Secondary Containment Portable Berm

All Berms are supplied packed in a plywood case, ready for dispatch worldwide, and include all necessary tools, instruction manuals, spares and repair kit.

Berm Frame

The common feature of the portable Berm is the steel framework, which forms a module 1.5m wide x tank height with galvanised steel pipe and cast aluminium fittings. Each fitting is locked in position by a hexagon socket screw tightened by an allen key (provided).

Berm material

The liner is fabricated from nylon reinforced Elvaloy, 1.00mm thick

- Tensile strength 265 DaN/5cm
- Puncture resistance 267 DaN
- Hydrostatic resistance 4.1MPa

The material is resistant to all petrochemicals and a wide range of acids and alkalines.

Sizes

Berms are manufactured to meet customer requirements, so can be produced in any size. However, sizes to suit common stored volumes are:

Capacity	Size
2,700 litre	3.0m x 3.0m x 0.3m
16,200 litre	9.0m x 6.0m x 0.3m
18,900 litre	10.5m x 6.0m x 0.3m
54,000 litre	10.5m x 9.0m x 0.6m
80,000 litre	15.0m x 9.0m x 0.6m

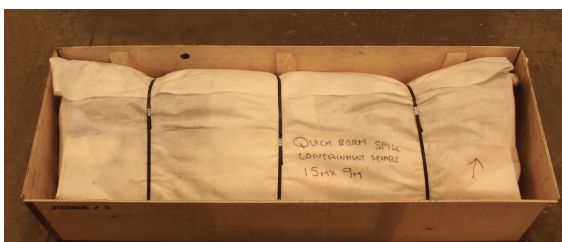

The Portable Berm is part of a range of fuel storage and distribution products
