## Butyl products Ltd Industry Sectors

- ◆ **CAMP INFRASTRUCTURE**  
Manufacturers and suppliers of water treatment, storage and distribution equipment plus sewage systems.
- ◆ **EMERGENCY AID**  
Manufacturers and suppliers of emergency water and sanitation equipment.
- ◆ **LANDSCAPE & CIVIL ENGINEERING**  
Specialist geomembrane design, fabrication and installation.
- ◆ **SPECIAL COMPONENTS**  
Manufacturers of flexible products and components in rubber and plastic.

Over 20 years experience in supplying water & sanitation equipment for camps in remote locations ..... Just call us !

**Butyl Products Ltd.** have been working with the British Forces and UN peacekeeping forces for many years. We supply water storage, treatment and distribution equipment as part of the camp design. Our water tanks have been used in Kosovo, Iraq and Afghanistan and have proven to be rugged and reliable in these difficult regions. Systems have been designed for camps from 50 up to 500 people. Our water and sanitation products and systems are also used in mobile hospitals, construction camps, remote mining camps and exploration camps.

### Design

We will work with your team to design a water & sanitation solution that meets your specific needs and camp layout. Kits supplied will contain all the compatible interconnections needed to fit all accommodation modules to ensure the camp is established quickly and smoothly. The systems utilise our range of products, designed for the purpose and proven in service over many years.

### Experience

Our experience encompasses military camps, construction camps and many remote location projects, and spans over more than two decades.

### Manufacture

Butyl Products manufacture a range of items for use in remote camps for gas & oil exploration, mining and field hospitals. All require a reliable, safe water supply and effective, environmentally sound sewage and waste disposal system. The systems must be cost effective, quick to install and dismantle, and be suitable for the life of the camp, which can be from 1 week to many years.

### Training

As well as offering a comprehensive problem solving service, Butyl Products will take responsibility for the training of engineers in the installation and maintenance of supplied equipment.

Full details of all of our products and services are available on our website:

# Butyl Products manufacture and supply the following range of water & sanitation equipment

## Galvanised Steel Liquid Storage Tanks

- 10,000 to 1,200,000 litre capacities
- Assembled in less than a day
- Open top, PVC or steel roof options

## Bladder Tanks

- 1,000 to 150,000 litre capacities for fuel storage
- 1,000 to 200,000 litre capacities for water storage
- For water, fuel or waste
- Storage or transport use

## Quick Tanks

- 3,000 to 40,000 litre capacities
- Emergency water storage
- Assembled within 15 minutes
- Easily maintained

## Water Pumps & Generator Sets

- High head water pumps
- Solids handling sludge pumps
- Drinking water & general purpose

## Water Treatment Chemicals

- NaDCC, Flocculation & disinfection sachets and tablets
- Aluminium Sulphate and Lime to aid flocculation and reduce pH levels to provide more palatable drinking water

## Water Testing Equipment

- Water testing equipment of all types from single on-site units to fully equipped laboratories

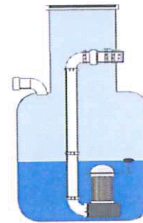

## Pipework & Fittings

- Steel, plastic and layflat canvas pipes
- Fittings to suit all pipe types
- Pipe welding machinery and tools

## Sewage Pipework

- Below ground pipework and chambers
- Grease separators
- Land drainage pipes

## Septic Tanks & Packaged Treatment Systems

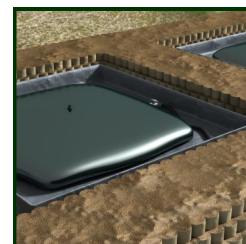

- In ground and above ground tanks
- Package pumping systems
- Sewage treatment plants

## Sewage & Solids Handling Pumps

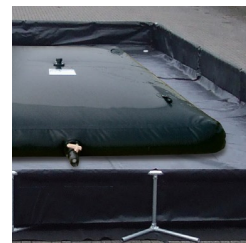

- A full range of pumps from 50mm to 150mm capacity for pumping high solids and sewage

## Fuel systems equipment

## Fuel Bladder Tanks

- Suitable for fuel storage
- Deployed by 2 people in 15 minutes
- Dispensing pumps available
- 1,000 to 150,000 litre capacities

## Secondary Containment Bunds

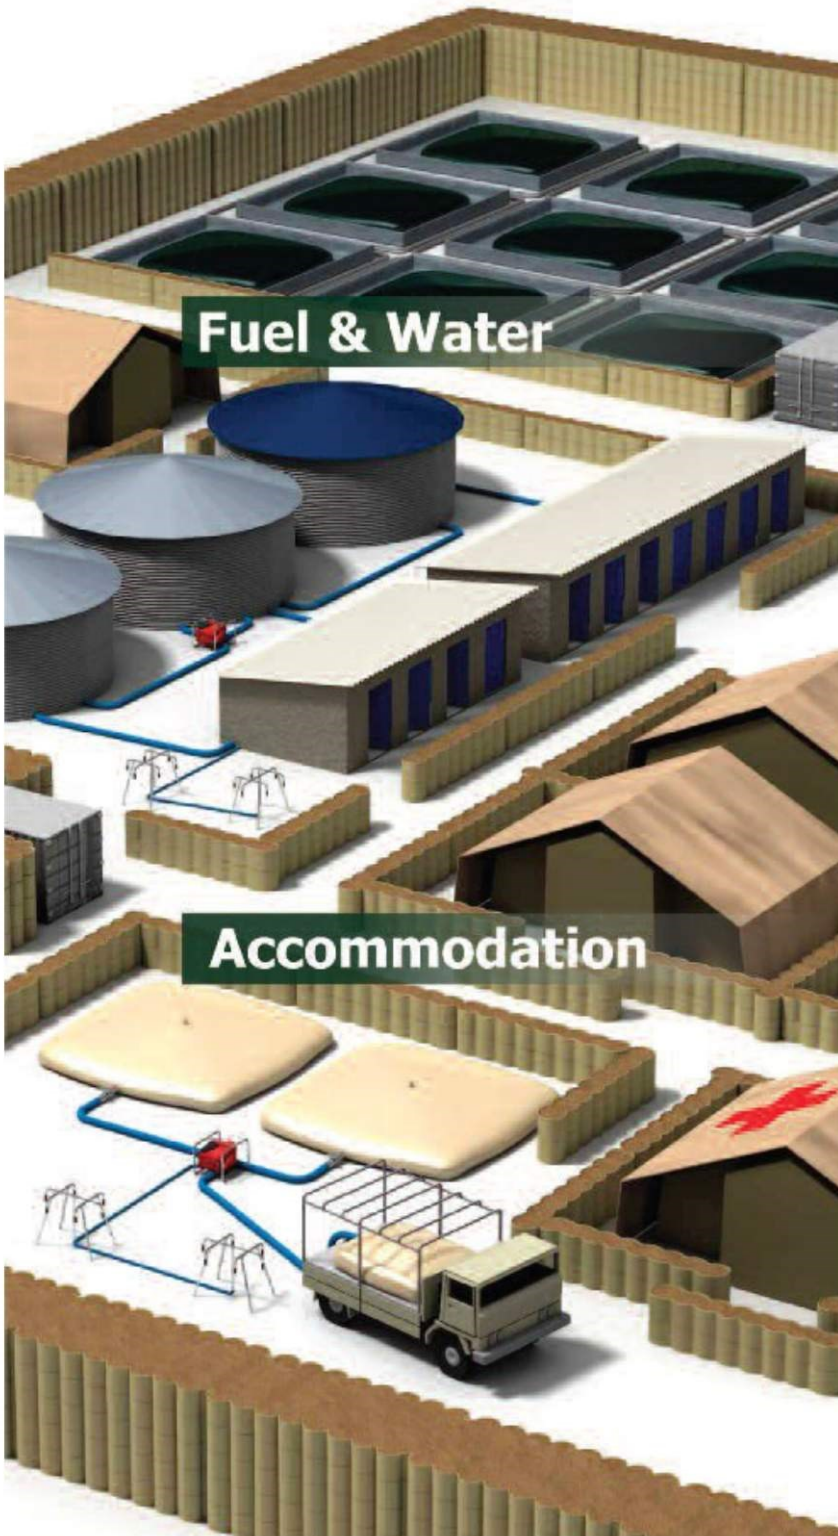

- Suitable for all petrochemicals
- Deployed by 3 people in 1 hour
- Reusable at different locations

## Fuel Pumps & Pipework

- Small low voltage fuel transfer pumps
- 50mm to 100mm diesel & electric powered fuel pumps
- Fuel hoses, meters & nozzles

# INTEGRATED CAMP SOLUTIONS

## Fuel & Water

## Accommodation

### Fuel Bladders

Manufactured in the UK and designed for harsh and extreme conditions, ranging from  $-30^{\circ}\text{C}$  to  $+65^{\circ}\text{C}$  and suitable for a large variety of chemicals and fuels.

Fully tested and approved by leading Military organisations

Available in sizes from 1,000 litres (220 Imp. Gallons) to 150,000 litres (32,995 Imp. Gallons).

### Water Bladders

Manufactured in the UK and ranging in size from 1,000 litres (220 Imp. Gallons) to 200,000 litres (43,994 Imp. Gallons) and suitable for **ALL** climates.

Fully approved for drinking water applications, installed by 2 people in under 15 minutes.

### Tap Stands and distribution kits

Our tap stands are manufactured from galvanised steel and can be adapted to suit most types of temporary and permanent water supply systems in all kinds of environments.

Supplied with self closing / non leaking taps for both low and high pressure use.

We supply flexible PVC pipework and connections in a variety of sizes to suit the customers requirements.
